SERVIO Technologies

Pueblo de Panay, Lawaan, Roxas City

January 27, 2026

Dear SERVIO Technologies Hiring Team,

I am writing to express my strong interest in an internship position at SERVIO Technologies. As a final-year Bachelor of Science in Computer Science student at Filamer Christian University with coursework in web development, database design, and practical IT support experience, I am eager to apply my technical knowledge and contribute to your team while gaining valuable industry experience.

Throughout my academic journey, I have developed a solid foundation in both backend and frontend technologies. I have hands-on experience building web applications using React and TypeScript for frontend development, and Laravel with PHP for backend systems. Additionally, I am proficient in SQL and MySQL for database design and management, and have practical coding skills in Python. These technical competencies have been reinforced through multiple course projects, including the development of POS systems and CRUD-based record management applications.

Beyond programming, I bring complementary skills that are valuable in a professional IT environment. I have practical experience with data management and spreadsheet automation using Microsoft Excel and Google Sheets, proficiency in office productivity tools, and familiarity with AI tools for task automation and documentation. My background also includes freelance work as an Excel Analyst, where I managed datasets, designed interactive dashboards, and delivered automated reporting solutions—work that required attention to detail, independent problem-solving, and accountability in a remote setting.

I am particularly interested in SERVIO Technologies because of your focus on technology solutions and services. I am motivated to learn from experienced professionals, contribute meaningfully to real-world projects, and develop expertise in the technology sector. I understand the importance of reliability, professional conduct, and continuous learning in a corporate environment, and I am committed to making the most of this internship opportunity.

I have attached my resume and the official recommendation letter from my university. I am available to discuss how my skills and enthusiasm can contribute to SERVIO Technologies, and I welcome the opportunity to meet with you at your earliest convenience.

Thank you for considering my application. I look forward to hearing from you.

Sincerely,

Lor Frederick James R. Aquino
